Transitioning from Ada 83 to Ada 95

This 1-day course is designed for software engineers who are familiar with the Ada 83 programming language as defined in the Ada Language Reference Manual ANSI/MIL-STD-1815A-1983 and the Ada 95 programming language as defined in the Ada Language Reference Manual ANSI/ISO/IEC-8652:1995. The course will highlight the major differences between Ada 83 and Ada 95. It will provide some guidelines on making the transition to Ada 95 with minimal impact to the existing system.
